

THE RITZ-CARLTON, HONG KONG

The Ritz-Carlton Hong Kong, the World's highest hotel, opened on March 2011.

The opening has marked the comeback of the Ritz-Carlton in Hong Kong, formerly located in Central in 2008. This New Ritz-Carlton is located on the top of Hong Kong's tallest building – International Commerce Centre (ICC), enjoying the best 360° panoramic views of Hong Kong.

Realizing the great demand for 5 star hotels, The Ritz-Carlton Hong Kong is ambitious to redefine luxury for their guests. To achieve this goal, this Hong Kong flagship hotel is focusing on providing the best food and catering services to fulfill the expectations of the travelers.

Being a top 5-star hotel, The Ritz-Carlton Hong Kong has blend its luxurious interior design with the functional refrigeration, inspired by Williams, as an ornament to the grand and elegant image of the hotel in areas including the lounges, bar areas and cuisines.

In addition to supplying the full range of refrigerators for the "Back-Of-House" kitchens of the hotel, Williams' Refrigeration has supported with its newly launched "Front-Of-House" series of cabinet & showcases, which are suitable for displaying the food, capturing the sight of the guests.

The Jewelry Box Type showcase are especially designed for fine pastries and desserts - delivering the luxury atmosphere.

This cooperation with The Ritz Carlton has turned a new page of modern refrigeration systems for Front-Of-House display.
