

CASE STUDY // COAST PORT BEACH, NORTH FREMANTLE WA

**WILLIAMS REFRIGERATION //
FOOD SERVICE EQUIPMENT**

www.williams-refrigeration.com.au

ABOUT THE PROJECT

Relaxed glamour on the beach

WA is making the most of its sunny, west coast location. The latest entry to the dining and entertainment scene is North Fremantle's *Coast*.

Coast was once known as *Salt on the Beach* but has undergone a massive refurbishment to make the most of its beachside outlook. The renovation has seen the addition of two outdoor bars to make patrons feel like they're nestled between the dunes.

**THE VENUE INCLUDES
A SPECIAL ENTRY
OFF THE BEACHFRONT
TO TAKE CARE
OF THE THIRSTY
BEACH CROWD**

The venue includes a special entry off the beachfront to take care of the thirsty beach crowd. The atmosphere that's been captured by the establishment is cool, beach-house glam.

The venue offers a variety of dining options including the main tavern *Coast*, with ocean views and industrial marine décor; *Cargo*, an elevated view and intimate, adults-only space, with a cocktail and modern tapas menu, as well as a popular DJ lineup; and *Kiosk* the takeaway hub for beach lovers serving coffee, cool drinks and casual eats.

Because of its location and open air nature, the refrigerated cabinets had to be able to withstand the hot, Australian summer temperatures.

Williams cabinets were chosen because they're built to handle temperatures of up to 43 degrees ambient. The *Williams* team worked on the engineering of the *Cameo* to help reduce the costs to the client and specially delivered the cabinets before their actual release date.

Several cabinets have been utilised in the build—a mix of new *Cameos* with triple glazed doors, *Opals*, *Opals* with blown airwells, *Pizza* cabinets plus a solid door *Boronia* for the coffee section.

The Consultant/Designer was Chris Arrell of [Hospitality & Foodservice Consultants](#), the Kitchen Contractor was Nick Fields of [KBR Commercial](#).
