

21st May 2021

Dear Customer,

I would like to announce that after more than twelve years of hard working leadership, Mr Brad Dunn has announced his retirement, and will step down from the position of Managing Director at Williams Refrigeration Australia.

During his tenure Brad has proudly led our business and our Williams Australia colleagues with continued success and leaves the company in a very strong position and with a very bright outlook.

I would like to take this opportunity to sincerely thank Brad for his great work and wish him all the very best for a long and relaxing retirement.

It is then with great pleasure that I would like to then introduce Mr Peter Hutchings who joins us on the 1st June 2021 as our new Managing Director. Peter is an energetic business leader with 30 years experience in leading Australian manufacturing and engineering companies, and also brings prior knowledge of refrigeration through his working in the compressor and air conditioning market.

Peter is also very hands on and engaging in his leadership style. He holds a Bachelor of Engineering with an MBA. He also has a strong sales and marketing focus to his skill set, making him ideally placed in now taking Williams Refrigeration Australia forward to its next phase of development and growth.

Peter, I and all the Williams Refrigeration team look forward to continuing to work with you.

Yours sincerely

T.S. Smith
Group Managing Director
