BACK BAR REFRIGERATION

Our back bar bottle coolers and bottle wells are designed to cope with the demands of a busy venue, operating efficiently to maintain temperature as doors continually open and close.

They are robust enough to survive a punishing level of wear and tear, as part of our commitment to refrigeration for the real world. However, they also look stylish and display premium bottled drinks to eye-catching effect.

They maintain an interior temperature of 4°C to 10°C, ensuring drinks are refreshing when served. They can be free standing, fitted under a back bar worktop or on shelving to give the impression of double stacking.

The bottle coolers are available as single, double and triple-door units, manufactured in stainless steel or hard-wearing black PVC-coated steel.

Glass doors and effective lighting ensure an attractive display, while adjustable shelves enable different sized bottles and cans to be stored efficiently.

Top loading bottle wells are ideal for back bar areas with high volume bottle sales, as they are designed for quick, efficient service and are easy to restock.

The Williams Bottle Well features a built-in bottle opener and cap catcher, as well as a security lock.

Williams also has a range of preparation counters that are the perfect partners to your back bar equipment.

For example, the Thermowell is a refrigerated countertop unit designed to keep ingredients such as fresh fruit or syrups chilled and easily accessible.

Similarly, the PW4 Prep Well is a mobile unit that can be easily moved around the bar area, meaning that fresh ingredients can be moved to where they are needed. Sliced fruit and other garnishes can be prepared ahead of time and kept perfectly cool ready for service.

BOTTLE COOLERS

Stylish, efficient and hard wearing, Williams' bottle coolers are the attractive yet functional way to display your drinks. From pubs and bars to universities and sports stadia, these refrigerated low level cabinets are suitable for a multitude of applications.

Available with 1, 2 or 3 doors and in a range of capacities, the bottle coolers benefit from double glazed doors with bright low energy lighting for excellent display.

These units are robust enough to survive a punishing level of wear and tear, with hard wearing PVC coated galvanised steel exterior. The interior is also made from tough stainless steel making it ultra hygienic and easy to clean.

The doors are also lockable for added security, meaning your products are kept safe and secure if they happen to be in an open environment.

For your convenience, all Williams bottle coolers feature fully adjustable shelving to suit loading requirements.

The adjustable levelling feet also ensures counter stability in any environment.

LOW HEIGHT MODELS

Williams bottle coolers (all models) are now available with a reduced height of 850mm, offering greater flexibility and allowing for installation under custom built bespoke bars.

GLASS FROSTER

With an operating temperature range of -10 to -20C our robust Glass Froster allows drinks to be served in an ice cold glass, providing an ideal addition to any bar looking to improve its quality of service.

BW600

BW900

BOTTLE WELLS

Williams' top loading bottle wells are ideal for back bar areas with high volume bottle sales, as they are designed for quick efficient service and are easy to restock.

With an operating temperature of +4°C/+10°C, you can be sure that your drinks are kept at peak condition throughout the night.

The sturdy BW900 accommodates up to 384 cans or 261 bottles, making it the perfect partner to your back bar operation.

The lid is both removable and lockable for security and ease of cleaning and restocking.

There's also a quick release drainage function at the bottom of the unit, making emptying excess moisture as simple as possible.

We know that when serving drinks, quickness and accessibility are key. The built in bottle opener with catcher will help speed things up for your staff during busy periods.

The super tough stainless steel interior and exterior mean that these bottle wells are durable and suitable for day after day of heavy use.
